Attachments: 3rd Party Verification Letter_Warm Springs PRVs Reconstruction (signed).pdf

Mat,

Here's what Craig and Derek pulled together Friday in relation to my ask on Warm Springs. If possible could use another letter of support from a informed 3rd party (such as yourself). The biggest need is emphasizing that this fix is rehabilitation/reconstruction of a major water system component not just a repair to the water system (such as a leaky pipe...). I also liked your mention of the contrasting approach of how the valves and related were reconstructed/replaced versus the complete "drop in" vault replacement approach (which wasn't done in order to cut costs). Anyways, any help you could provide would be much appreciated. I'm hoping to take another shot at this by mid-week.

Thanks,

Tom

Thanks Matt,

I agree with IHS as the lead, but I'm thinking in this particular case two letters would be better than one if at all possible. I'll update you after the meeting today.

Tom

Tom,

Sorry. I've been tied up yesterday and today. I'd be happy to help you with an interpretative statement if IHS cannot help. However, I do think IHS as a technical service provider and construction program is a more appropriate entity to provide you with a response.

Mat
